CERTIFICATE WITH RESPECT TO SEIZED ITEMS

We, 簡和祥 許懷文, 張送男, declare on penalty of criminal punishment for false statement or declaration that my position with the Authority of R.O.C. (Taiwan) are, in order, Forensic Officer, Prosecutor's Investigator and Prosecutor. The Ministry of Justice Investigation Bureau ("MJIB") and Taichung District Prosecutors Office ("TDPO") lawfully seized custody of the items described in Tables 1 through 11 of the Indictment of TDPO with 2017 Investigation Numbers 11035, 4520, 5612, and 5613 ("Taiwan Indictment"). The items were provided in the condition as noted below to TDPO, which transferred in turn in exactly the same condition to the Taichung District Court when the Indictment was filed to the court. Under Taiwan law and procedure, the court acts as a repository for evidence in its original, received condition. The evidence in the court's possession should therefore be unchanged from the condition of the evidence when it was provided to the court.

The article provided to the United States is a hard drive that contains exact images of information described as “forensically extracted and saved in Warehouse Seized Item (“WSI”) No. 48 portable hard drive after forensic extraction” in the columns of notes of Table 1-Table 11 attached to the Taiwan Indictment. Each image is a true and accurate copy of the forensically extracted data from the 25 seized devices, which is made pursuant to the procedures described below.

- Description of Article(s) Provided to the United States:

See 「三、關於移交證據硬碟內目錄所存檔案之描述」 (Paragraph Three -- Description concerning the files stored in the hard drive (WSI No. 48) delivered as evidence, “Paragraph Three Description”) in the attached Statement on the Delivery of Evidentiary Items (“證物移交說明”, “the TDPO Statement”) to this Certificate.

- The Change in condition while in custody of MJIB:

The MJIB seized (for detailed dates and places of the seizure, please refer to the TDPO Statement) 26 electronic devices (WSI No. 10 later found damaged) possessed by the defendants. The devices were immediately delivered to the MJIB Forensics Laboratory (“the Lab”) for forensic

examination. The Lab used "X-Ways Forensics V18.6" forensic software, following the "key words" provided by Taiwan Micron, the claimant in the Taiwan Indictment, to search and locate the relevant part of the data contained in the devices. The lab then used software "XRY V7.2" developed by Micro Systemation and software Universal Forensic Extraction Device developed by CelleBrite to extract from the devices the parts of the data which are related to the case. All these extracted relevant parts of the data have been uploaded to and saved in WSI No. 48. The 25 items of the articles are specifically listed in Paragraph Three Description in the TDPO Statement, as well as in column of notes in Table 1-11 attached to the Taiwanese Indictment.
